Summary

Aspiring Data Analyst and Software Engineer with hands-on exposure to AWS cloud services (S3, EC2, Lambda), Python-based automation, and data visualization (Power BI, Tableau). Skilled in data-driven decision making, ETL, and dashboard automation, with practical project experience in EDA, predictive modeling, and evaluating ML model outputs for accuracy, consistency, and real-world usefulness. Comfortable working with Git-based version control across the full project lifecycle, from requirement analysis to testing.

Education

VIT Bhopal University <i>B.Tech, Computer Science and Engineering</i> Specialization: Cloud Computing and Automation Class XII – Science Stream <i>Percentage: 88.6% – Mukhyamantri Meritorious Student Scheme Awardee</i>	Bhopal, MP CGPA: 8.3/10 2023 – 2027 2022
--	--

Technical Skills

Data Analytics & BI: Power BI, Tableau, MS Excel (Pivot Tables, VLOOKUP), Matplotlib, Seaborn
Programming & Databases: Python (Pandas, NumPy, Scikit-learn), SQL (MySQL)
Cloud Computing: AWS (S3, EC2, IAM, Lambda, SageMaker)
Tools & Version Control: Git, GitHub
AI Tools: ChatGPT, GitHub Copilot — used for code assistance, debugging, and reviewing AI-generated output quality
Machine Learning: Regression, Classification, Predictive Modeling, Model Evaluation

Experience

Health Hackathon & Academic Project Experience <i>Computer Science Domain</i> - Participated in a health-focused hackathon, building and evaluating ML pipelines (Python, Scikit-learn) for prediction accuracy and data analysis - Developed Computer Vision and NLP applications for real-world healthcare automation - Collaborated in a team environment to design, build, and present a working prototype under time constraints	Feb 2024
Student Trainee / Project Trainee <i>VIT Bhopal University</i> - Built a Face Swapping System, AI Narration App, and Hospital Management System using Python - Applied core CS concepts including OOP, data structures, databases, and cloud fundamentals - Worked across the full development lifecycle — requirement analysis, implementation, testing, and version control	Sep 2024 Bhopal, MP

Projects

Hospital Management System Hackathon Project - Designed a system to manage patient records, billing, and appointment scheduling - Worked in a team-based hackathon environment with strict deadlines and role-based task distribution - Gained practical exposure to system design, database usage, and real-world problem solving	Feb 2024
Telvex AI – Customer Churn Prediction Python, Pandas, Scikit-learn, Streamlit, Plotly, AWS - Built an end-to-end ML-powered SaaS dashboard to predict customer churn using historical usage and support data - Performed data cleaning, EDA, and handled class imbalance using SMOTE before model training - Trained and compared Logistic Regression, Decision Tree, and Neural Network models for accuracy and consistency - Designed an interactive Streamlit dashboard with login authentication, risk scoring, and Plotly visualizations	2026
Meeting Summarizer Python, FastAPI, Groq API (Whisper, LLaMA/Qwen), JavaScript, HTML/CSS - Built a full-stack web app that transcribes meeting audio and generates AI-powered summaries with action items - Integrated Groq's Whisper API for speech-to-text and LLM-based summarization with automatic model fallback	2026

Achievements & Certifications

- Google IT Support Certificate – Google Career Certificates
- Introduction to Data Science – Cisco Networking Academy
- Insights on Computational Data Science – IU Indianapolis
- The Bits and Bytes of Computer Networking, Python for Beginners –Scaler
