

MEET SHARMA

Email ID : meetsharma572@gmail.com | Ph: 9691469273 | [Linkedn](#) | [Github](#) | Bhopal , Madhya pradesh

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering | 2023 – Present
VIT Bhopal University
Specialization: Cloud Computing and Automation

Class XII – Science Stream | 2022
• Secured 89%
• Awarded *Mukhyamantri Meritorious Student Scheme* for academic excellence

Technical & Soft Skills

Programming Languages: Python, SQL (MySQL), R (Basic)

Data Science & ML Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Keras

AI & Deep Learning Frameworks: TensorFlow, Keras, Artificial Neural Networks (ANN), Convolutional

Data Visualization & BI Tools: Power BI, Tableau, Looker Studio

Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, VS Code, PyCharm, MS Excel

Generative AI & LLM Tools: ChatGPT, GitHub Copilot, Microsoft Copilot, Gemini

INTERESTS & EXPERTISE

Data Science & Analytics: Data Preprocessing, Data Cleaning, Exploratory , Data Analysis (EDA),

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering,
Model Evaluation, Model Optimization, Predictive Modeling

Artificial Intelligence & Deep Learning: ANN, CNN, RNN, Computer Vision, Natural Language
Processing (NLP), Transfer Learning, Model Training & Hyperparameter Tuning

Advanced AI Concepts: Deep Learning Pipelines, Generative AI, Large Language Models (LLMs), Prompt
Engineering, Model Deployment (Basics)

Soft Skills: Effective Communication (Written & Verbal), Team Collaboration, Presentation Skills, Time
Management, Adaptability

Work Experience

Student Trainee / Project Trainee | VIT Bhopal University

Sep 2024

- Worked on academic and project-based learning involving Python programming and system development.
 - Developed applications such as Face Swapping System, AI Narration App, and Hospital Management System.
 - Applied core computer science concepts including data structures, databases, and cloud fundamentals.
-

Hackathon & Academic Project Experience | Computer Science Domain

Feb2024

- Participated in team-based hackathon and academic projects under time constraints.
Developed ML pipelines (Python, scikit-learn) for prediction and data analysis
Built AI applications (Computer Vision, NLP) for real-world automation
Applied preprocessing, feature engineering, and model evaluation to improve accuracy

Personal Projects

Face Swapping Application |

- Developed a computer vision-based face swapping application using OpenCV and Poisson Blending techniques.
 - Focused on accurate facial alignment, feature mapping, and realistic image transitions.
 - Strengthened understanding of image processing, computer vision fundamentals, and visual data handling.
-

AI Narration Application |

- Built an AI-based narration system that reads newspaper content aloud using OCR and text-to-speech technology.
 - Designed the application to improve accessibility for visually impaired users.
 - Implemented end-to-end workflow including text extraction, processing, and audio output generation.
-

Hospital Management System | Hackathon Project | [Link](#)

- Designed a system to manage patient records, billing, and appointment scheduling.
- Worked in a team-based hackathon environment with strict deadlines and role-based task distribution.
- Gained practical exposure to system design, database usage, and real-world problem solving.

Achievements & certifications

- [Introduction to Data Science – Cisco Networking Academy](#)
- [Insights on Computational Data Science – IU Indianapolis](#)
- [Fundamentals of Artificial Intelligence & Machine Learning – Vityarthi, VIT Bhopal](#)
- [The Bits and Bytes of Computer Networking ,Python for Beginners – Scaler](#)
